

APPLICATIONS ENGINEER

As the lead UK air conditioning manufacturer, operating from our state-of-the-art 23,000m² manufacturing facility in Rawdon, we work hard to be the best. Established in 1974, we have a strong history of innovation and quality that has allowed us to grow and develop into the world leading global company we are today. In the UK alone we have more than 650 employees and we are growing rapidly; as part of the Modine group we employ over 11,000 employees worldwide.

Our equipment supports the way we live and work, whether it be providing precise climate control for data centres that support our digital lives, or comfortable, clean air in hospital wards. Innovation is key to our success and that is why we invest so heavily in our people. We attribute much of our achievement to the quality of engineers, sales, marketing, finance and administration people who have chosen to be part of our team.

The Opportunity

An excellent opportunity has arisen for an Applications Engineer to work as part of the Applications Engineering team reporting to the Applications Engineering Team Leader.

The Role

Responsibilities for this role include:

- To support the growth and development of the sales team through provision of quotes and delivery of order information for customer services and manufacturing
- Dealing with customer technical sales enquiries
- Support the external sales team
- Respond to any external sales enquiries
- Provide details of orders to customer services and manufacturing
- Liaising with third party suppliers at specification stage

Skills/Experience

- Engineering knowledge to a minimum of HND or degree
- Ability to work with different groups within Airedale
- Problem solving skills to overcome challenging obstacles
- Excellent interpersonal skills
- Ability to use own initiative
- Excellent communication skills

Training will be provided for the right applicant to develop the skills and knowledge required for the position.

Prospective candidates must have proof that they have the right to work in the UK.
