

Multi Skilled Maintenance Technician

The Opportunity

An excellent opportunity has arisen for a proactive and flexible individual to join the Facility Maintenance Team as a Multi Skilled Maintenance Technician reporting to the Manufacturing Systems Team Leader. The role is to be a leading Team Member for maintaining and supporting the effective smooth running of the Manufacturing Process, Building Services and Equipment.

The Role

- To be a key dependable individual able to support and drive the team.
- Able to prioritise tasks and have effective time management.
- Work within planned preventative maintenance (PPM) schedules.
- Carry out maintenance to ventilation, heating, mechanical and electrical systems.
- Carry out repairs to property, fixtures, fittings and equipment.
- Utilise BMS and Lighting control systems.
- Respond to machine breakdowns in a timely manner.
- Control contractors / issue work permits / observe work activities.
- On call rota for technical support with potential need to attend site in an emergency.

Job requirements

- Minimum 3 years' experience working within Facilities Management / Building Maintenance.
- Experience within a manufacturing environment desired but not essential.
- To have leadership qualities to support and drive team successes.
- Strong work ethic and ability to work unsupervised.
- Ensure competence with health, safety, and environmental requirements.
- Professional conduct when dealing with colleagues, visitors and contractors.
- Eager to learn and advance skills and knowledge with willingness to attend training to attain relevant qualifications when required.
- To have proactive involvement in new installations and alterations to plant.
- Willingness to learn machine operations and assist with repairs.
- Willingness to deal with all aspects of maintenance including, blocked toilets and spillages.
- Required to be flexible with work hours to rectify breakdowns as priorities and demands dictate.
- Drive to improve Quality and define root causes

Skills and Qualifications

- BS7671 - 18th Edition Wiring Regulations Qualified or recent standard.
- City & Guilds, BTEC or NVQ equivalent in Electrical Installation Level 3.
- IPAF 3a & 3b MEWP licence or willing to obtain qualification.
- Experience in using BMS (BEMS) and lighting control systems.
- Knowledge of legislation related to H&S, Environment and Building Regulations.
- HVAC experience in Plumbing / Heating Systems / Ventilation.
- Mechanical experience would be advantageous with knowledge of machinery such as: CNC Lathes / Milling Machines / Surface Grinders / Punching Centres / Press Brakes / Fin Press / Expanders / Benders / Compactors / Guillotines / Pipe Benders / Loom machines / PLC Controllers / Welding Machines/ Hydraulics

Training will be provided for the right applicant to develop the skills & knowledge required for the position.

Applications should be made in writing with an up to date CV to Rachel Phillips in HR by 8th January 2021
